**Subject:** Bayou Corne Natural Gas Seep-Activities conducted on Thursday, September 6, 2012 between 0800 hrs. to 1630 hrs.  
**Date:** 09/06/2012 04:06 PM

---

Activities performed by LDEQ personnel on Thursday, September 6, 2012 between 0800 hrs. to 1630 hrs. included the following:

- 24/7 air monitoring / oversight was conducted at the drilling site. Duties included review of facility's real-time monitoring data with the facility/contractor personnel, review of alarm readings and also calibration and maintenance records for facility's air monitoring instruments, and hand-held air monitoring at 9 (nine) established monitoring points. Parameters monitored included CO, H<sub>2</sub>S, VOCs, LEL, and O<sub>2</sub>. All readings were below the low action levels and within normal O<sub>2</sub> readings. All hand-held air monitoring was conducted using a MultiRae air monitoring instrument. LDEQ completed a total of 4 rounds of hand-held air monitoring at the 9 monitoring points.

- Other observations noted that drilling and borehole sampling activities were ongoing.

- No additional problems or issues were encountered.
